

Stop Cardiff Workers Paying to Park at Work

Sign this petition to send a clear message: workers should not be made t rice of getting to work.

Cardiff Council is considering a Workplace Parking Levy that is currently being modelled at **£750 per workplace parking space, per year**.

Evidence from Nottingham, the scheme Cardiff cites as its model, shows that many employers passed these costs on to employees.

For thousands of workers, driving to work is not a choice. Shift workers, carers, disabled workers, mobile workers and those without reliable public transport should not be punished simply for getting to work.

We call on Cardiff Council to:

- Guarantee that workers will not be charged to park at work.
- Publish the full impact on employees before any decision is made.
- Improve public transport before introducing any levy.
- Protect workers with no realistic alternative to travelling by car.
- Consult meaningfully with trade unions and affected workers.

Sign this petition to send a clear message: workers should not be made to pay the price of getting to work.
