Sign our petition for a school nursing service

School support staff carry out some of the most important work with our children and should be able to focus on meeting their educational needs. Currently 82% of GMB schools members are providing healthcare support to pupils with medical conditions - something they never expected to do.

The DfE must ensure the NHS provides a clinical school nursing service to all state-funded schools to ensure children receive the healthcare they need. Here's what you can do to understand your rights and support our campaign:

1.

Sign our joint NJC union petition calling for an NHS clinical nursing service in all state-funded education settings.

Read our FAQs to understand your rights and responsibilities.

2.

3.

Email schools@gmb.org.uk to nominate yourself or a colleague as the GMB Campaign Lead for your school so we can keep in touch.
