GUIDELINES FOR CONGRESS BUSINESS

These guidelines provide a broad, but flexible, framework for dealing with Congress business and have been drawn up in accordance with the Rules of the Union. They are intended as guidelines for the President, Congress and the Standing Orders Committee itself.

1 CONGRESS

Congress is convened and delegates are elected subject to the provisions of the Union RuleBook. Congress shall conduct its business at the following times:

Sunday	10.00am - 12.30pm
Monday-Thursday	9.30am - 12.30pm 2.00pm - 5.00pm

It may be necessary, depending on the amount of Congress business, to schedule a session for Sunday afternoon.

Changes in these times will be discussed between the President of Congress and the Standing Orders Committee.

2 STANDING ORDERS COMMITTEE

The Standing Orders Committee shall be appointed in accordance with Rule 9. The members of the Standing Orders Committee shall elect a chair from amongst their own number.

The Standing Orders Committee shall have power to recommend to Congress proposals on the conduct of Congress business as covered by these guidelines.

The Standing Orders Committee shall meet as and when may be necessary to arrange Congress business.

The Central Executive Council may appoint up to three Observers to advise Standing Orders Committee.

3 GENERAL MOTIONS AND RULE AMENDMENTS

Motions on general policy and to amend rules shall be placed on the agenda according to the provisions of the RuleBook.

It is the responsibility of the Standing Orders Committee at Congress to make recommendations to Congress for the handling of the agenda.

The Standing Orders Committee has three responsibilities in respect of Motions submitted to Congress:

- (1) The Committee shall determine whether or not each Motion is "in order" for debate at Congress i.e.
 - whether the Motion ought to be dealt with by a more appropriate body (for example a JIC or a Section or Delegate Conference);
 - whether, at a Congress which is not a Rules Revision Congress, the Motion conflicts with a rule, or is an explicit rule amendment or would require a consequential rule amendment to give effect to its provisions;
 - whether the Motion covers more than one subject;

- whether, after consultation with the delegation, the provisions of the Motion are still relevant and appropriate to the present situation (i.e. whether the Motion has been "overtaken by events");
- whether the wording of the Motion is incomprehensible;
- whether at a Rules Revision Congress, a rule amendment Motion would leave a rule deficient;
- whether the Motion conflicts with a previous Congress resolution that it does not expressly seek to overturn.

If a Motion comes within any of these categories, it shall be ruled "out of order" by the Standing Orders Committee, and the Committee shall recommend to Congress accordingly.

- (2) The Committee shall make proposals to Regional delegations on the withdrawal of a Motion in favour of another Motion on the Congress agenda. In determining whether to recommend the withdrawal of a Motion, the Committee shall ensure that the principles and proposals incorporated in that Motion are fully covered by the Motion that will remain on the agenda.

A Regional delegation is entitled to reject the Committee's proposal to withdraw, and to allow its Motion to stand on the agenda.

If a Regional delegation agrees to the withdrawal of its Motion the Standing Orders Committee will, if it wishes, recommend the right to second the other Motion or the right to speak in support of it. The Standing Orders Committee will report the recommendation accordingly to Congress.

- (3) The Standing Orders Committee shall assist Regional delegations in the drafting of composite resolutions and shall make proposals and recommendations accordingly.

In determining proposals on composite resolutions, the Committee shall bear in mind the following points:

- that the principles and proposals of the Motions concerned are covered in the composite resolution
- that the wording of the composite resolution reflects the meaning of the original Motions.

The first Report of the Committee shall, as far as possible, report on agreed composite Motions, and/or indicate those Motions which are being considered for compositing and fix the time and place at which Regional delegations are required to meet the SOC either to discuss the compositing of Motions, or any other matters relating to Motions standing in the name of a Regional delegation.

In the event of a delegation failing to respond to an invitation to meet the SOC this shall be reported to Congress with the recommendation that the Motion shall fall.

If in the opinion of the SOC a Regional delegation has unreasonably declined to composite a Motion, this shall be reported to Congress with any recommendations that the Chair of SOC deems appropriate.

If it is proposed to composite Motions on which the CEC has adopted different attitudes, the CEC Observers shall consult with the General Secretary. The Standing Orders Committee and the Delegations involved in the proposed compositing shall be informed of the CEC attitude prior to the proposed composite being finalised.

If the Regional delegation agrees to a composite resolution, agreement will then be sought between the delegations concerned on which shall move and second the resolution and, where appropriate, which Regional delegation shall have the right to speak in support of it. The Standing Orders Committee will report the recommendation accordingly to Congress.

Priority in debate will be given to those delegates who assist in achieving a composite.

4. EMERGENCY MOTIONS

Any Delegate wishing to submit an Emergency Motion shall in the first instance seek the agreement of his/her Regional delegation that the Motion is an Emergency Motion. It shall then be referred to the Standing Orders Committee, which shall decide whether the Motion is an Emergency Motion after taking account of the following points:

- whether the Motion involves a serious situation needing quick action
- whether the Motion relates to events that have occurred after the closing date for motions as prescribed in the RuleBook
- whether the Motion relates to a decision already taken by the Congress which is in session and would consequently amend or rescind the decision.

Emergency Motions can be composited.

5. WITHDRAWAL OF MOTIONS

If a Regional delegation wishes to withdraw a Motion in the name of a branch of the Region, or in the name of the Regional Committee, the Regional Secretary shall notify the Standing Orders Committee.

6. MATTERS OF URGENCY

Any delegate wishing to bring before Congress "a matter of urgency" not on the agenda shall in the first instance seek the agreement of his/her Regional delegation that the matter is one of urgency in accordance with Rule 70. It shall then be referred to the Standing Orders Committee, which shall recommend whether or not the matter is one of urgency, after taking account of the following points:

- whether the matter needs immediate decision and is a matter which is not (whether by Motion or otherwise) already on the agenda
- whether the matter could have been dealt with adequately in an ordinary Motion placed on the Congress agenda, or by an Emergency Motion.

The Standing Orders Committee shall inform the President of Congress and Congress of its recommendation. The President shall then, in accordance with Rule 70, put the Motion that the matter be taken as a matter of urgency, and it is then the responsibility of Congress to decide whether the matter be so brought forward.

7. CENTRAL EXECUTIVE COUNCIL

The Central Executive Council has the right within rule to submit Motions to Congress. The Central Executive Council will notify Regional delegations of these Motions prior to their pre-Congress meetings.

The Central Executive Council shall have the right to submit Motions as "a matter of emergency" to Congress. The Central Executive Council should notify the Standing Orders Committee of their intention to do so.

Subject to the provisions of Rule 8, the Central Executive Council members should only speak at Congress where they are representing Central Executive Council policy. Where a Central Executive Council member is asked by his/her Regional delegation to speak to the Regional delegation's policy, he/she shall only do so provided the delegation's policy is not in contravention with Central Executive Council policy.

8. DEBATING PROCEDURE

The Procedure for debating Congress Motions shall normally be at the discretion of the President who will indicate to Congress wherever appropriate, the procedure or procedures he/she intends to adopt.

In determining the procedure for debating Motions, the President shall have regard to the following points:

- no resolution of the Congress in session can be amended, rescinded or negated by a subsequent Motion, at that Congress;
- precedence in debates shall be given to a Motion of the Central Executive Council;
- the procedures for taking Motions are as set out in Rule 70 Clauses 3-18 in respect of Council meetings;
- rule amendments take precedence in debate over general Motions;
- personal attacks on colleagues should not take place.

The Standing Orders Committee shall advise the President what Motions will fall if another motion or a Special Report is carried.

9. TIME LIMITS FOR SPEAKERS

The times for speakers will be recommended by the Standing Orders Committee, taking account of the amount of business on the agenda.

It may be necessary, in order that the business of Congress is properly completed, that time for speakers be curtailed. The Standing Orders Committee shall recommend revised times for speakers to Congress.

If, in the interests of saving Congress time, a Motion that the Central Executive Council is accepting without qualification is formally moved and seconded, there shall be no CEC speaker on the Motion.

10. VOTING

It shall be within the discretion of the President to determine the manner of voting, whether it be by a show of hands, a tellers vote or a card vote.

Only Delegates seated in the Congress Hall should vote. If, in exceptional circumstances, the President instructs that the doors to the Hall be closed, he/she should give prior warning to Delegates.

Show of Hands: The President shall call for those in favour to show, and shall then call for those against.

Teller Vote: The tellers elected for each Region shall, when the President of Congress instructs, count the hands raised In Favour. They will report this total to the General Member Auditors. The tellers then shall likewise count the hands raised Against, and similarly report the total to the General Member Auditors. The General Member Auditors shall report the result to the President.

Card Vote: A book of voting cards will be issued to each delegate. Each book will contain numbered cards marked "For", and cards marked "Against". The number on each card is to identify the number of the vote, and cannot be used to identify the individual voting. The appropriate voting card will be selected and used by the delegate to vote either "For" or "Against". The card must not be marked in any way, but placed in the ballot box provided by the teller.

When the President has decided that a card vote is necessary:

- (a) tellers will provide a ballot box for each regional delegation;
- (b) the President will announce the number of the card to be used – for example: ‘Card Vote number 1’;
- (c) delegates will choose the appropriate numbered card, marked either “For” or “Against” from their book of voting cards and place it into the ballot box provided;
- (d) once the President has announced ‘Card Vote completed’ tellers will take the ballot boxes to the General Member Auditors;
- (e) the General Member Auditors will count the votes, and notify the President of the result

President: The President of Congress shall have no vote. If there is a tied vote, then the motion shall fall.

11. VOTING FOR PRESIDENT AND VICE-PRESIDENT

The President and Vice-President of the Union shall be elected by Congress, in accordance with the provisions of Rule 12 and 13. Ballot papers bearing the names of the candidates will be issued at Congress.

12. LITERATURE

No literature or leaflets - other than official GMB literature - may be distributed inside the Congress Building without the prior permission of the Standing Orders Committee.

Literature, wherever distributed, which is intended to influence the voting intentions of delegates to Congress, should be brought to the attention of the Standing Orders Committee.

13. PREVIOUS CONGRESS DECISIONS

The following Motions, carried at previous Congresses, relate to the conduct of Congress.

1974 CONGRESS, BLACKPOOL, MOTION 257 *PRE-CONGRESS DELEGATE MEETINGS*

Congress agrees that in order to widen the area of debate, and to achieve a more democratic expression of Congress delegates, Pre-Congress meetings should determine their voting intentions, with regard to resolutions from within their own Region, and matters reflecting a point of principle. But should not determine an intractable attitude to resolutions from other Regions until the conclusion of the general debate.

PERIVALE BRANCH
(London Region)

1985 CONGRESS, BLACKPOOL, SPECIAL MOTION *CORE RULE 34*

Congress re-affirms the powers of the Central Executive Council as provided for within Rule to revise Officials' salaries and matters related to conditions of service.

CENTRAL EXECUTIVE COUNCIL

1993 CONGRESS, PORTSMOUTH, MOTION 144 *CONGRESS DOCUMENTS*

Congress agrees that at future Congresses, all documents provided by the Central Executive Council and any Motions with several components, shall be voted on by paragraph or section, where that year's Congress decides by a majority vote to do so. Congress can thus reject parts of documents and Motions without rejecting all that is presented.

MELTON GENERAL BRANCH
(Midland & East Coast Region)

1999 CONGRESS, BLACKPOOL, MOTION 9 *CONGRESS DEMOCRACY*

Congress has previously resolved that Pre-Congress meetings should not determine an intractable attitude to resolutions from other regions until the conclusion of the general debate (1974 Congress).

Congress now demands the end of the practice of regions mandating delegates on any motions other than those of their own region, unless a major matter of principle is involved.

NORTH WEST LONDON BRANCH
(London Region)

2003 CONGRESS, BLACKPOOL, MOTION 11 *UNION DEMOCRACY*

Congress calls for delegates to have democratic freedom.

It would be of assistance to have voting procedures explained at start of Congress.

At last Congress many delegates supported motions but voted against because they were instructed to oppose.

New delegates were not aware they could have free votes.

GMB CONGRESS 2005

STANDING ORDERS COMMITTEE REPORT NO. 1

The business of Congress will be conducted in accordance with the Agenda, the Programme and the Guidelines for Congress Business, subject to changes at the President's discretion.

TIMES FOR CONGRESS

The Standing Orders Committee wishes to draw the attention of Delegates to the starting times of the morning and afternoon sessions set out in the Congress programme as follows:

Sunday 5 June	10.00 am - 12.30 pm 2.00 pm – 4.00 pm
Monday 6 June to Thursday 9 June	9.30 am - 12.30 pm 2.00pm - 5.00 pm

The Standing Orders Committee recommends that the President be authorised to close each session when appropriate, without further reference to the Standing Orders Committee or to Congress.

TIMES FOR SPEAKERS

The Standing Orders Committee recommends the following Time Limits for Speakers.

General Motions and Rule Amendments:

Movers up to	4 Minutes
Seconders up to	2 Minutes
Other Speakers up to	2 Minutes

Officers' Reports:

General Secretary up to	10 Minutes
Deputy General Secretary up to	7 Minutes
Movers of Section Reports up to	5 Minutes
Questions up to	1 Minute

Officers' and Section Reports, and questions to them, should relate only to matters of general policy, and not to details of negotiations.

Special Reports and CEC Statements:

Mover up to	6 Minutes
Secunder up to	3 Minutes
Other Speakers up to	3 Minutes

It would help the business of Congress enormously if, wherever possible, motions could be formally seconded, and if replies to questions and debates were kept to a minimum.

The Standing Orders Committee draws Delegates' attention to the two rostrums and asks speakers to be ready by the vacant rostrum when it is their turn to speak. Chairs will be provided at the front of the hall for speakers awaiting their turn.

QUESTIONS ON BALANCE SHEET AND AUDITORS' REPORT

Questions on the Balance Sheet and Auditors' Report must be submitted in writing to the Congress platform no later than 5.00 pm Tuesday 7 June.

MOTIONS OUT OF ORDER

The Standing Orders Committee has ruled that the following Motions are Out of Order for the reasons specified:

1. Annual Congress

3. Annual Congress

Rule 8.1 provides for biennial Congress, Both of the motions either conflict with that rule and/or would require a consequential rule amendment to give effect to its provisions. Congress 2005 is not a rules revision year, so the motions are out of order at this year's Congress.

2. Accountability

4. Annual Congress

9. Annual Congress

Each of the above motions either conflict with Rule 8.1 and or/would require a consequential rule amendment to give effect to its provisions. In addition, each motion refers to bi-annual (twice a year) Congress, when Congress is held every alternate year. Congress 2005 is not a rules revision year, so the motions are out of order at this year's Congress.

41. Separate Sectional Status for Health and Care Sector

Rule A1 sets out the number of GMB Sections. Giving effect to motion 41, which calls for separate sectional status for the Health and Care Sector, would need an amendment to that Rule. Congress 2005 is not a rules revision year, so the motion is out of order at this year's Congress.

42. National Secretary for Public Services

This motion, which calls for the Public Services Section to have a National Secretary dedicated solely to it without any other sectional responsibilities, is contrary to the Special Motion adopted at Congress 1985 under which authority over conditions of employment by the Union is reserved to the CEC.

69. Benefits

70. Increased benefits

Both motions call for changes to mileage rates. These would require an amendment to Rule 34. Congress 2005 is not a rules revision year, so the motions are out of order at this year's Congress.

74. Union contributions

The motion calls for a three tier banding system for membership contributions, based on earnings rather than hours worked. This would require an amendment to Rule 47. Congress 2005 is not a rules revision year, so the motion is out of order at this year's Congress.

82. Union's Finances

The motion calls for the Union's finances to be regionally managed and the split to be adjusted to a 80%/20% split, the lesser amount being returned nationally from the Regions. This would require amendments to Rules 28 and 29. Congress 2005 is not a rules revision year, so the motion is out of order at this year's Congress.

86. Death Benefit

The motion calls for an increase in the level of benefit set by Rule 56, and would require an amendment to this Rule. Congress 2005 is not a rules revision year, so the motion is out of order at this year's Congress.

195. Redundancy criteria for the Working Rule Agreement for the Construction Industry

The motion relates to a specific element of terms and conditions, redundancy, in the Working Rule Agreement for the Construction Industry. In accordance with the Guidelines for Congress Business, the motion ought to be dealt with by a more appropriate body i.e. the CFTA Section Conference.

231. Local Government Craft Pay Claims

The motion relates to a specific element of local authority craft workers pay. In accordance with the Guidelines for Congress Business, the motion ought to be dealt with by a more appropriate body i.e. the Public Services Section Conference or the JNC for Local Authority Craft Workers.

232. National Secretary, Public Services Section – London – Southern Provincial Councils

The motion refers to a specific element of local government negotiating machinery in order to restart the Provincial Councils. In accordance with the Guidelines for Congress Business, the motion ought to be dealt with by a more appropriate body i.e. the Public Services Conference or the NJC for Local Government Services.

COMPOSITE MOTIONS

Agreement has been reached on the Composite Motions printed in the Final Agenda.

ELECTION OF PRESIDENT AND VICE-PRESIDENT

In the event of a contested election of President and/or Vice-President of the Union, the Committee recommends the following procedure:

The General Secretary should announce the names of the candidates to Congress immediately after this Report.

Ballot papers will be prepared under the supervision of the Standing Orders Committee. Immediately after this Report, the General Member Auditors will deliver to each Regional Secretary the envelope containing the ballot papers for lay delegates of the Region. Central Executive Council members and other non-voting delegates are not entitled to vote in this election. The Regional Secretary will issue a ballot paper to each delegate entitled to vote.

If any delegate arrives late, his/her Regional Secretary should accompany the delegate to the General Member Auditors and request a ballot paper.

Each delegate is entitled to place their voting paper in one of the ballot boxes at the front of the hall. Tellers are not responsible for collecting ballot papers in this election.

Voting will close at 2.30 p.m. on Sunday 5 June, at which time the General Member Auditors will take the ballot boxes and count the votes. They should report the result to Congress before the end of the afternoon Session on the same day.

MOBILE PHONES

If mobile phones are brought into the Congress Hall, they must be switched off at all times when Congress is in session.

FILM CAMERAS

The Standing Orders Committee has given permission for film cameras to be used in the Conference Hall. The Committee has been assured that filming will be carried out with no interference to Delegates.

BUCKET COLLECTIONS

Requests for permission to hold Bucket Collections should be submitted in writing to the Committee by mid-day on Monday 6 June. (It is a term of Exhibitors' agreements with GMB that they will not request permission to hold a collection.) The Committee will consider the request and notify the applicant of the outcome. Where permission is granted, those requesting the collection must organise, count and bank the collection, if necessary liaising with the Congress office for support from Congress Stewards. They must then notify the Congress office of the amount collected, so that the President can inform Congress.

By agreement reached at Congress 96, Regional Committees will each contribute a further sum to the national Congress gift. So permission will not be granted for a collection to augment the Congress gift.

UNION ORGANISATION**CONGRESS****†1. ANNUAL CONGRESS**

Congress agrees in the interest of accountability and democracy to the membership, the time is now right to return to annual Congress with immediate effect.

2 ALTRINCHAM BRANCH
Lancashire Region

†2. ACCOUNTABILITY

Congress is the supreme decision making body of the Union: to continue with bi-annual Congress flies in the face of democracy.

To ensure true transparency and return to true democracy for the lay members of the Union we call upon every delegate to support a return to Annual Congress starting with June 2006.

22 BURNLEY BRANCH
Lancashire Region

†3. ANNUAL CONGRESS

Congress believes that Transparency and Accountability are the most used buzz words in the GMB Union.

To ensure that transparency and accountability are more than just buzz words, lets give them real meaning and demand a return to annual Congress where transparency, accountability and democracy can be seen to be applied.

115 MANCHESTER BRANCH
Lancashire Region

†4. ANNUAL CONGRESS

Congress agrees that the GMB returns to holding Congress annually.

The business of running a modern Union efficiently has been trivialised by holding Congress biannually and has brought about such things as CEC surveys, thus undermining the Rule Book which says that the policy making forum of the Union shall be Congress.

181 WARRINGTON BRANCH
Lancashire Region

†9. ANNUAL CONGRESS

This Congress calls for a return of Congress to an annual Congress. The experiment to move to a bi-annual Congress has been tried, but we feel that it has proved that the span between Congress is too long, it prevents the GMB from progressing and profiling issues and accountability to the governing body has been diminished. Although the initial idea to move to a bi-annual Congress was financial, this has not proved in the long run to be cost effective or operationally sound.

MID GLAMORGAN C & T BRANCH

14. POLICY

Congress is concerned that motions that have been referred in previous GMB National Conferences have fell into a black hole.

Therefore, Congress instructs the CEC to ensure that all motions referred will be on the CEC agenda as soon as possible, and a decision made on these motions within one year of the Congress motion referred.

15. T&G MERGER

Congress notes the recent press coverage on a possible merger with the T&G Union. Congress is concerned that the General Secretary is prepared to talk to the T&G on this subject, without the authority of Congress or the CEC. Congress now demands there should be no talks or meetings with the T&G on the issue of a merger.

17. MERGER

This Congress orders the General Secretary to cease all merger talks with the T&G and/or any other of the big three unions.

18. MERGER

This Congress remains disturbed by the continual “rumours” about the GMB merging with other unions. Congress instructs the NEC to keep the membership fully informed about any talks, whether official or unofficial, with other unions, their General Secretaries and officials. Whilst not necessarily opposing a merger Congress believes that any such change should be undertaken from a position of strength, not weakness and in such a way that the GMB emerges stronger and not subject to a “take over”. This can only be achieved if the membership is able to make fully informed decisions about the GMB’s future.

19. TGWU

20. GMB – THE FUTURE

This Congress congratulates the CEC in bringing the union back into financial stability. It is accepted that many difficult and painful decisions had to be made in order to put the Union on a firmer financial footing.

Congress further notes the growth of multi national corporations and their control and influence over the lives of working people. The era of local employers is long over. In order to equip ourselves and the trade union movement to better defend and protect working people from these global predators, Congress believes that increases in organising and collective strengths are vital. Congress therefore calls on the CEC to take bold initiatives, as they did with the financial problems and seek to create a new trade union organisation which can defend and advance the interests of members and working people across the United Kingdom.

PLAISTOW BRANCH
London Region

21. NEW UNIONISM

This Congress agrees that Will Thorne founded this union with the intention of organising the unorganised - to go out to low-paid workers in insecure industries and, through militant struggle, take on the bosses to better the lot of the worker.

Today many workers, especially young and overseas workers, are in low-paid and insecure jobs and not in a union – in fast food restaurants, temporary jobs and the service industries.

The unions often aren’t there to organise them to defend themselves.

The gap between rich and poor has grown dramatically under New Labour – the top 1% owned £355bn in 1996, by 2002 that had increased to £797bn. Meanwhile the wealth of the poorest 50% of the population shrank from 10% in 1986 towards the end of the Thatcher Government’s second term to 7% in 1996 and 5% in 2002. On average, each individual in the top 1% was £737,000 better off that just before Mr Blair arrived in Downing Street.

Partnership unionism means getting into bed with the very bosses who are profiting from our members’ low pay and long hours.

Now, even more than ever, there is a need for a battle for social justice, to redress social inequality – a battle that the unions should be leading.

Just as 100 years ago, there is now a desperate need for a “new unionism” that reaches out to the unorganised and helps them form strong organisations that can take on the fat cat bosses to win a living wage, a safe workplace and a just society.

Attempts to build unions by advertising the “offers” and “services” they can provide have been a spectacular failure.

The limited attempts at taking an organising approach in the GMB and in the broader union movement at home and overseas have helped slow the tide of decline. Stepping up that turn could turn things around.

A union that organises effectively in the interests of its members must be run democratically by its members.

There has been talk inside the union of forming a new union, with another established general union.

Therefore Congress agrees to:

Refocus the union’s resources and efforts significantly towards organising workers around campaigning in the workplace to deal with the issues of their concern.

Mainstream “organising the unorganised”, throughout the union’s work, making it a key focus all the union’s activity, with a particular focus on organising young, overseas and other “non-traditional” workers.

Reject notions of “partnership” with the bosses and with a Government that is doing the bosses’ bidding.

In any negotiations to create a new union, insist on the guiding principles of that new union being those of the founders of the GMB and the “new unionists” of the turn of the 19th/20th Centuries - of organising workers to win.

47. MAINSTREAMING OF GMB YOUNG MEMBERS

Congress notes that most of our young members who have joined the GMB are not involved at any level.

The only way of meeting this challenge is by creating dynamic and vibrant youth structures which provides for more effective access to GMB mainstream structures for young people.

Congress recognises that organising young people in the workplace is a challenge given that more young people are moving into Further Education.

Congress further recognises that it is vital for the GMB that a new generation of young trade union activists are developed and calls on the GMB to:

- Encourage and promote increased young member activity.
- To develop and publish a GMB National Strategy on mainstreaming young members.
- To ensure that GMB can support any agreed new activity.

49. REGIONAL AND NATIONAL RACE ADVISORY COMMITTEE SUPPORT

Congress welcomes the opportunities and efforts which the GMB as a union has put in the fight for equality of opportunity for all in both the private and public sectors. This Branch further commends the GMB for setting up the various Regional Race Advisory Committees and the National Race Advisory Committee within its structures.

Congress is however concerned that the GMB, having established these Committees, do not provide the committees with the necessary support and assistance to enable the lay members who serve on the committees to fulfill their role and carry out their functions which they are elected to perform.

We therefore call upon the CEC to ensure that proper systems and dedicated support are put in place to enable the committees and their members to fulfill their duties. We also call upon the CEC to request a report back on all activities of the National Race Committee and the CEC Race Task Group at each of its meetings

In future, no freeze should ever be put on the benefits paid to our activists unless it is in line with a GMB pay freeze, as much of our lay representatives' work is to complement and subsidise the workload of the Officers of the Union. 90. ALTERNATIVE FUNDING FOR GMB BENEFITS

Congress calls on our leadership to consult with activists and the wider community to seek out and source alternative funding for projects that would benefit our membership.

One example would be the recent DWP contracts that were offered up for bidding to any organisation that could engage, advise and assist pensioners with regard to Pension Tax Credit. Congress accepts that we stand in solidarity with our fellow members in the Civil Service who face huge job cuts as a result of this change in DWP and Government policy; however we must accept the reality of the situation.

One thing that every Trade Union could have done would be to apply for one of these contracts as an organisation that already engages with many thousands of retired members and pensioners on a weekly basis. We could have employed the same DWP employees that are facing a precipice to carry out this work. Sounds ridiculous, but you can rest assured that there are private firms out there who will be clicking their heels because we dismiss such ideas as ridiculous.

This bidding process is over but it was only one of many, and it was open to Trade Unions. We may disagree with whether it should have ever happened but just ask our retired members who they would sooner go to for advice and support regarding their benefits, their Trade Union or Joe Bloggs Advice Ltd, and we know what the answer would be.

EQUAL OPPORTUNITIES

©2 96. EQUAL PAY

Congress is deeply concerned that the Women and Work Commission has decided to delay the decision on whether to pursue mandatory pay audits for a further year.

For too long employers have been able to hide behind a veil of secrecy with regard to pay, mandatory pay audits now would have led to real progress for women.

Occupational segregation is still a major contributor to the gender pay gap with women being concentrated in the lower paid occupations.

The “Glass Ceiling” and “Sticky Floor Syndromes” currently act as barriers to women’s progression as they struggle to advance into higher grade jobs and still predominantly in four of the five lowest paid occupations.

Congress therefore calls on all negotiators to Campaign for the introduction of:

- Mandatory transparent equal pay audits.
- The introduction of set time limits for the implementation of Action Plans following the results of Equal Pay Audits.

©2 97. EQUAL PAY

We ask Congress to continue lobbying for equal pay audits and equalities impact assessments to be undertaken by all employers and not just within the public sector. Even in the public sector who, as part of the three pay award, have been tasked by the NJC to undertake equal pay awards, employers are dragging their heels as many have still not implemented single status job evaluation schemes. We request Congress share good practice across regions where local authorities have undertaken these audits with the GMB input.

By having a JE scheme does not give automatic right of an equal pay structure – why do we still have part-time women workers in the care sector, cleaning, catering and schools still earning less than their male equivalents.

When a restructuring or reduction in services are being undertaken, local authorities should be made to undertake an equalities impact assessment jointly with the trade unions. This would show any inequality that may result from any changes to both services and staffing implications. The Equal Pay Commission, Working Group on

Equalities is currently working on this but employers appear less than keen to progress this. Congress we call upon you to support this motion.

Congress calls upon the CEC to continue to campaign for improvement in the legislation on Equal Pay. We welcome the setting up of the Women’s Work Commission to look at Equal Pay and the Pay Gap and Trust that the Government will take on board their findings.

It is over thirty years since the Equal Pay Act gave women the right to equal pay, but many of our sisters are still undervalued and not receiving the same salary as their male colleagues. This is particularly obvious in women graduates who on average will receive a salary 15% lower than their male graduate colleagues. This is unacceptable and must not be tolerated, in the main girls are out-achieving boys as far as A level results are concerned and their expectations as far as salaries are concerned should be comparable to their male colleagues.

We should now demand that this legalisation is amended and no longer should our sisters, daughters and granddaughters be treated as second class employees.

Congress recognises that despite 30 years of equal pay legislation the gender wage gap in the UK remains.

Congress applauds the success of the GMB’s campaign in the public sector and in particular recognises that retrospective compensatory payments and the introduction of new pay and grading structures in both local government and the NHS will have an enormous impact on the gender wage gap.

However, discrimination in the private sector remains widespread and requires urgent action to address.

Congress calls upon the CEC to commission detailed research into the gender pay gap in the private sector and to plan the required legal and financial resources to campaign to eradicate discrimination in the private sector.

This Congress notes that despite several raft of equal pay legislation over the last thirty years the gender pay gap still stands at around thirty per cent, dependant on whose research is examined.

Cuts and privatisation coupled with anti union legislation have driven down the wages and conditions of the lowest paid workers while executive pay has spiralled out of control.

- Continued problems of sleeplessness, loss of appetite and tiredness due to long hours, shift working and night working.
- There was a serious problem of secondary smoking and poor air quality causing eye and throat irritation for half of those surveyed.

Congress instructs the CEC to formulate, develop and put into effective practice a campaign to redress the anticipated negative outcome for PGPS GMB members of the outcome of the GMPS consultation process ending March 31 2005.

The campaign should address:

- Reopening of the consultation process with particular emphasis on the potential changes in 2008 for LGPS
- Protection of the benefits of the existing scheme
- Recognition from the employers that the present scheme represents members' pay and that adverse changes represent a pay cut for our members
- Strong emphasis on the depth of feeling of our LGPS members. A straw poll in Plymouth indicated an extremely strong 4-1 vote in favour of ongoing industrial action in support of maintenance of the present scheme
- No further employer pension holidays
- A comparison exercise with the state-provided pension scheme provisions for our Parliamentary representatives.

This is to be additional, not as a replacement, to a well funded national government retirement pension scheme. Legislation must safeguard those workers who have paid contributions for many years in company schemes and who have planned for retirement on reasonable expectations. Employers should be encouraged to automatically enrol staff in their pension scheme and non-members should be invited to join on an annual basis. Congress believes at a time when many companies are scrapping Final Salary Pension Schemes for their workers, company directors often ensure that they are in 'better' schemes than their workforces and pay more into their pension schemes than many of their workers earn in a year.

Although we believe everything must be reviewed to achieve this, increasing the state retirement age is not an option and should be totally rejected in any future consideration.

Although not exhaustive, the campaign should include:

- Reinstating the link between the basic state pension and earnings
- Making employer contributions to second tier pensions compulsory
- Ensuring security for second tier pensions whether occupation or private based
- Ensuring that providers of pensions are legally tied to minimum final pensions agreed at the times they are sold

166. EMPLOYMENT LEGISLATION

Congress is asked to recognise that some employers are using this legislation to dismiss our members who challenge their need to work to the beck and call of their employer. This is not about performance or code of conduct but allows employers to justify dismissal on the grounds of 'irretrievable breakdown in the working relationship' the fact that it is at the manager's instigation that this has taken place appears to be irrelevant. In some instances staff have been suspended then informed there has been an 'irretrievable breakdown' whilst they have to wait up to 18 months to go through the internal process. It is then extremely difficult to prove the working relationship has not broken down when the employee has been suspended for such a long period of time. Some Local Authorities are now trying to implement a specific policy in order to cover themselves. We are therefore calling upon Congress to gather examples of this misuse of legislation and challenge it nationally.

©12 167. WORKPLACE DISCIPLINE – DISMISSAL

Congress requests that the General Secretary, in conjunction with the TUC, will lobby a returned Labour government, to review the basic principles of the above and produce a more fair and credible system, reflecting the natural laws of justice in a modern democracy.

Any employee, unfairly dismissed, should have the right of re-instatement with compensation for the 'injury to feeling', trauma and embarrassment etc. or alternatively, the choice of non return and a higher level of compensation. It must be recognised that families make large commitments on the basis of their continuous employment. Furthermore, losing your job, is rated as one of the most damaging and traumatic of possible life events.

The burden of proof, to dismiss, must be approaching that which is required in the criminal justice system. Employment tribunals should be able to judge more than the reasonableness of procedure and should be able to impose and substitute their own unbiased view based on objective and universal standards.

There should be no upper limit on the level of compensation for all unfair dismissals and amounts should reflect all relevant factors, for example, loss of earnings, years of service, age, loss of pension potential. This list is not exhaustive.

This Congress deplores the trafficking and exploitation of migrant workers in Britain and calls on the CEC to campaign and lobby the Government to ensure that these workers are protected and not exploited whilst working in the UK.

There is evidence that private employers in the UK are using coercive tactics to force migrants to work for low wages and in poor conditions, these coercive techniques include physical and sexual violence to debt bondage and blackmail. Migrant workers are taken on by labour agencies and given employment in sectors such as building work, farming, contract cleaning and residential care, but these agencies take a vast proportion of their wages.

This is an anathema to our Trade Union movement and it must be regulated. We, as a movement, have always fought for human rights and this is a blatant abuse of workers rights, whether they are UK citizens or not, these abuses must be stopped.

178. FIXED TERM CONTRACTS

Congress is deeply concerned at the dire effects which fixed term contracts (between contractor and client and not of employment) and the whole ethos of this principle has upon our GMB membership and activists.

Contracted out labour, as the result of privatisation across a broad brush of industry, finds itself hived off to employers, keen to seek fixed quotation contracts with clients, usually and for whom our members originally worked of periods now extending to 20 and even 25 years!

With rising operational costs, this leads to shortfalls in the contractor's finances, already keen to drive down cost, to little in the way of collective bargaining, to the long hours culture and to just about everything that can be said to be wrong with the British workplace today.

Congress therefore calls upon the CEC to draw to the attention of Government, a practice which is seriously disturbing to the very fabric of family life in whole communities and to deliver on its promises of a better work life balance.

Congress, we are all well aware of the decline in manufacturing in the UK, but most people will be unaware that over the last few years over 800 manufacturing jobs have been lost within the Remploy organisation. This has, of course, affected our most vulnerable members and as you will appreciate these jobs have provided members with disabilities, to work within their local communities, thus giving them opportunity of employment which in turn rewards them with a decent standard of living, providing them the dignity and sense of purpose this employment brings to their lives. 223. SCHOOL WORKFORCE REFORM

Congress notes that in January 2003 the GMB and other school workforce trade unions, together with the Government and employers signed a national agreement on workforce reform in schools. I can understand why the GMB signed the agreement; it was a visionary statement of intent and offered support staff recognition and joint working with teachers

But what has happened in practice. There were three statutory changes which improved teachers' conditions, which have been/will be implemented between September 2003 and September 2005. The resulting reduction in workload and responsibilities undertaken by teachers has had to be absorbed by support staff.

The Government does not want to see national pay grades for support staff to reflect increased responsibilities and workloads, and prefer to see solutions achieved by local bargaining. But how many local authorities have provided fair and just amendments to support staff grades to reflect changes brought about by the national agreement. My own authority Sheffield has introduced a new pay and conditions package which shows a pay reduction for one group and virtually no change for the other groups of workers.

©21 243. PUBLIC PROCUREMENT

Congress believes that it is a scandal that billions of tax payers' money is spent each year on supplies procured for the Public Sector which are not produced and manufactured in the UK. Public Procurement involves a whole range of products and we believe that it is vital to ensure job sustainability and protect manufacturing jobs within the UK that contracts are given to companies that are UK based and manufactured within the UK.

Congress therefore calls upon the CEC to urge the Government to make the process of securing public procurement contracts more accessible for British companies who are based and manufacture in the UK, thus giving the tax payer value for money. Many of these contracts are awarded in the majority of cases by those companies who submit the lowest tender and many accomplish this by manufacturing this work off shore to meet these tendering costs.

If contracts are awarded to UK firms who manufacture in the UK, this would provide work for UK citizens who in turn will be supporting the economy by paying taxes and reducing the burden on the state by reducing the need for state benefits that would be paid to those unemployed as a result of manufacturing job losses. We must also look to the future by providing work for our youth and our potential members.

POLITICAL**LABOUR PARTY****255. A RADICAL LABOUR GOVERNMENT**

Congress would welcome the return of a Labour Government for a 3rd historic term.

The GMB will need to use its full campaigning expertise to ensure that the government will remain committed to implementing those policies that were jointly agreed at the Warwick National Policy Forum in 2004.

If Labour is to build on its achievements since 1997 and reverse disillusion in 'New Labour' then it needs to adopt a radical approach to make progress in resolving problems concerning investment in public services and manufacturing and also to look at protection of pension funds and extending employee rights.

If a majority of the working population can benefit from radical social reform, then it should be possible to achieve a 4th term of office for a future Labour government and so deny office to the right wing Conservative Party for many years to come.

This Congress notes with deep concern the continuing pro business drift prevalent among senior individuals in the Labour Party.

Successive so called New Labour Governments have actively encouraged facilitated and promoted a pro privatisation agenda, failed to repeal the most significant parts of the Tories anti union legislation and pursued murderous imperial adventures abroad, slavishly following the dictates of the US government and their corporate military paymasters.

The GMB therefore resolves to launch a political campaign among the membership with a view to encouraging the take up of individual Labour Party membership at the first stage of a campaign to draw the party closer to pro working class policies.

The campaign should be linked to a political education campaign aimed at raising understanding in relation to GMB policies on issues like privatisation, employment law, pensions and foreign policy.

The aim of the campaign would be to encourage both GMB branch affiliations to local Labour Parties with delegates

from the GMB being sent to the appropriate meetings, linking up with GMB and other trade union members who are also individual members of the Labour Party with a view to halting the right wing drift and returning the party to true Labour policies that benefit ordinary working people.

EUROPEAN CONSTITUTION

©26 285. THE UK REFERENDUM ON THE EU CONSTITUTION

Congress notes that the “social” policy of the EU has been established from the very beginning of what has become the EU and incorporates completely trade union aims of full employment, workers and trade union rights, health and safety, training, maternity rights, integration of disadvantaged groups etc.

Therefore, Congress believes that the EU Constitutional Treaty will commit Member States to pursuing a social market economy, underpin the goal of full employment, promote social dialogues between employers and trade unions, enshrines a range of social, civic and political rights and entrench the key values of the European Social Model, which will ensure that European economic development goes hand in hand with employment and social rights.

Congress regrets that some Member States attempted to dilute the legal force of the Charter of Fundamental Rights, contained in the Constitution, but is satisfied that the Charter will apply to the full field of EU law and thus restrain Member States from abandoning the course toward a sound social market economy.

Congress welcomes the move to enhance the democratic accountability of the European Union and increase its efficiency in light of the recent enlargement to 25 Member States.

However, this must only be the case, if the constitution, as adopted by the UK, provides for a genuinely harmonised Europe in terms of quality employment rights, based on the original principles of the European Social model.

The GMB will not support any constitution that erodes the fundamentals of a social Europe. The proliferation of the ideas of ‘Reaganomics’, Thatcherism and the free market doctrine of the Bush administration must not be allowed to prosper in a harmonised Europe. 331. LABOUR STANDARDS IN THE LATIN AMERICAN BANANA INDUSTRY

This Congress is seriously concerned about the impact on labour standards of the “Race to the Bottom” currently being pursued in the banana industry and calls on the GMB and our affiliated bodies to continue to support the banana workers’ unions of Latin America.

Companies chasing ever cheaper supplies of bananas are lowering wage levels, reducing working conditions and threatening independent trade union organisation throughout Latin America. The major British supermarkets have an increasingly powerful role in the international banana supply chain and through membership of the Ethical Trading Initiative (ETI) have signed a Base Code of Conduct accepting responsibility for upholding certain minimum labour standards. These include the freedom to organise independent trade unions, the right to collective bargaining (as recognised in International Labour Organisation standards) and the right to earn a living wage. However two recent trade union delegations to Costa Rica, which supplies one in four bananas sold in Britain, found systematic trade union repression and a failure to pay a living wage on many banana plantations.

To this end, Congress recommends that the GMB

- a) send a message of solidarity to the Latin American Coordination of Banana Worker’s Unions (COLSIBA) in support of the struggle to organise in Costa Rica and throughout the Latin American banana producing regions.
- b) lobby the Government, welcoming their recognition that the enforcement of labour standards is essential to international efforts to reduce poverty, but expressing serious concern about the violation of workers’ rights in the Latin American banana industry.
- c) work with Banana Link to encourage British supermarkets to ensure that labour standards, as detailed in the ETI Base Code of Conduct, are respected all along the international banana supply chain.

333. INTERNATIONAL SOLIDARITY IN IRAQ

This Congress agrees that child and sweatshop labour is a scandal and although virtually eradicated in this country through a century of union struggle it is still a blight on our international movement.

Some of the high street’s most famous names, including Nike, Gap, Adidas and Reebok, have been exposed by the newspapers, and TV programmes such as Panorama, as sweatshop employers.

Children as young as 11 have been found working in scandalous conditions in factories commissioned by these companies to produce their goods.

A single top or pair of trainers can cost more to buy in the UK than the worker who produced them receives in a month. The average wage for a Nike worker in Vietnam is under £30 a month.

Forced overtime, sexual abuse, poor health and safety conditions and violence and harassment, especially against trade unionists, have been uncovered by reporters and trade union and government investigators.

The No Sweat organisation campaigns in the UK, with other campaigning groups such as Labour Behind the Label and trade unions including the GMB, to end child and sweatshop labour and for workers’ rights at home and abroad.

Workers in sweatshops must be free to organise their own, independent trade unions. Codes of conduct and “multi-stakeholder initiatives” mean nothing unless the workers themselves can enforce standards such as a limit to the working week, no forced overtime, decent health and safety.

Furthermore this Congress notes that:

In Iraq, despite the twin pressures from the occupying forces and the often reactionary, religious, so called “resistance”, workers are organising trade unions and other independent, secular struggle organisations.

Prominent among these are the Federation of Workers Councils & Unions of Iraq, the Iraqi Federation of Trade Unions, the Union of the Unemployed in Iraq and the Organisation of Women’s Freedom in Iraq.

These developing unions—of workers, women and the unemployed—are the best hope for a secular, democratic and socialist Iraq, free of both imperialist aggression and religious reaction, and deserve the full support of the GMB and the Trade Union Movement.

This Congress agrees to:

Campaign against sweatshop labour and exploitation, in solidarity with our sisters and brothers all over the world and publicise the work of No Sweat and others campaigning against child and sweated labour.

To affiliate “No Sweat”.

To make sure that our purchases and investments are “sweat-free” and “union-made”.

To campaign to force employers to buy their work wear and supplies “sweat-free” and “union-made”.

To restate our opposition to the war on Iraq and to the continued occupation, whilst condemning outright atrocities committed against workers in Iraq by religious armed forces.

And to make a donation of £1000 to the Iraqi trade union movement, to be split equally between the IFTU and the FWCUI.

This Congress congratulates the TUC conference on unanimously adopting a resolution calling for an early withdrawal of US and British troops from Iraq.

We note that this resolution is in line with opinion polls showing that most people in this country want an early date set for the withdrawal of troops from Iraq.

We call upon the GMB to exert maximum pressure on the TUC to implement the policy of calling on the Government for withdrawal.

We re affirm our support for the national organisation Stop the War Coalition and resolve to promote and support activities called by them and give them financial support.

We mandate the GMB to pay the £5000, agreed at Congress 2003, to the Stop the War Coalition and a further £2000.

This Congress impresses upon this Labour Government that the nation no longer supports any incursions by the US into any further countries (ie Iran or North Korea) under the guise of trumped up evidence. ©32 341. MAKE POVERTY HISTORY

Congress notes that Oxfam and other NGO's are promoting a drive to Make Poverty History (though changes to trade rules, debt cancellation, more aid). Changes to trade rules and debt cancellation are not, by themselves, adequate policies to tackle 'Third World' poverty. We need to support democratic movements, and above all the trade union movement, in developing countries. British government policy includes pressure for the privatisation of public services and 'liberalisation of markets' which includes a race to find cheaper and cheaper labour sources.

This Congress further notes that, for example, when the municipal water system was privatised in Manila families saw their water rates rise by over 300% in six years (War on Want). Meanwhile parasitic consultancy firms such as PriceWaterhouseCoopers and KPMG have made vast amounts from directing the privatisation of water, rail, electricity and postal services in developing countries.

Congress notes that the G8 is a club of the major industrialised, capital nations, whose summits deal with macroeconomic management, international trade and relations with developing countries from the standpoint of these states. That world trade is estimated to be worth \$10 million a minute – the world's 49 least developed countries account for only 0.4% of this (Christian Aid). That the cost of eradicating poverty would be 1% of global income (UNDP).

The next G8 summit will take place at Gleneagles in Scotland on July 6-8; and that a major demonstration against G8 policies will be taking place in Edinburgh.

This Congress resolves to engage with NGO's to promote an agenda which includes opposition to the drive to privatise basic public services; support for democracy campaigns; support for free trade unions and the right to a living wage.

This Congress notes that the campaign against the G8 is the first opportunity to press the campaign to 'Make Poverty History' and therefore the GMB resolves to support the demo.

342. INTERNATIONAL GLOBALISATION

Congress recognises that global capitalism is not the saviour of global poverty.

Congress believes that global capitalism enslaves global poverty. It is the poor in developing countries who pay a deadly price for the excesses of the west.

Conference expects the GMB to play a leading part in spreading the message of International Socialism through global solidarity and the International Confederation of Free Trade Unions.

It is incumbent on us to give true freedom and democracy to the poor nations of the world. Through international socialism it will bring about democratically elected governments and in turn replace the many dictators the people of the third world have to suffer. It is time for the workers of the west to pay back what has been taken from the workers of the poor nations.

Conference urges the GMB to speak up. Stop global capitalism pitting worker against worker. We must set aside our differences. The GMB should promote the benefits of international co-operation and stop the cut-throat competition.

Conference want to see once again “the workers of the world to unite”

Conference wants the peoples of the world to know that American imperialism is not the only show in town!

344. PRIVATISATION IN DEVELOPING COUNTRIES

Congress agrees that Privatisation of public services has led to increased poverty in many developing countries and there is increasing evidence of damage caused by such privatisation.

However, developing country governments are left with little choice; they are trapped between the wishes of their electorate on one side, and the threat of withdrawn loans, debt relief and aid on the other. Therefore the GMB demand that DFID removes privatisation as a condition of its development assistance.

Congress therefore supports the campaign led by CND and the American Peace movement to stop the programme.

EQUAL PAY

Congress recognises that despite 30 years of equal pay legislation the gender wage gap in the UK remains.

This Congress notes that despite several raft of equal pay legislation the gender pay gap still stands at around thirty per cent, dependant on whose research is examined.

It is over thirty years since the Equal Pay Act gave women the right to equal pay, but many of our sisters are still undervalued and not receiving the same salary as their male colleagues. This is particularly obvious in women graduates who on average will receive a salary 15% lower than their male graduate colleagues. This is unacceptable and must not be tolerated, in the main girls are out-achieving boys as far as A level results are concerned and their expectations as far as salaries are concerned should be comparable to their male colleagues.

Cuts and privatisation coupled with anti union legislation have driven down the wages and conditions of the lowest paid workers while executive pay has spiralled out of control.

For too long employers have been able to hide behind a veil of secrecy with regard to pay, mandatory pay audits now would have led to real progress for women.

Occupational segregation is still a major contributor to the gender pay gap with women being concentrated in the lower paid occupations.

The “Glass Ceiling” and “Sticky Floor Syndromes” currently act as barriers to women’s progression as they struggle to advance into higher grade jobs and still predominantly in four of the five lowest paid occupations.

Congress therefore calls on all negotiators to Campaign for the introduction of:

- Mandatory transparent equal pay audits.
- The introduction of set time limits for the implementation of Action Plans following the results of Equal Pay Audits.

Congress applauds the success of the GMB’s campaign in the public sector and in particular recognises that retrospective compensatory payments and the introduction of new pay and grading structures in both local government and the NHS will have an enormous impact on the gender wage gap.

We ask Congress to continue lobbying for equal pay audits and equalities impact assessments to be undertaken by all employers and not just within the public sector. Even in the public sector who, as part of the three pay award, have been tasked by the NJC to undertake equal pay awards, employers are dragging their heels as many have still not implemented single status job evaluation schemes. We request Congress share good practice across regions where local authorities have undertaken these audits with the GMB input.

By having a JE scheme does not give automatic right of an equal pay structure – why do we still have part-time women workers in the care sector, cleaning, catering and schools still earning less than their male equivalents.

When a restructuring or reduction in services are being undertaken, local authorities should be made to undertake an equalities impact assessment jointly with the trade unions. This would show any inequality that may result from any changes to both services and staffing implications. The Equal Pay Commission, Working Group on

Equalities is currently working on this but employers appear less than keen to progress this.

Discrimination in the private sector remains widespread and requires urgent action to address. Congress is deeply concerned that the Women and Work Commission has decided to delay the decision on whether to pursue mandatory pay audits for a further year.

This Congress therefore resolves that the union will redouble its efforts, industrially, legally and politically to end the scandal of a gender pay gap that still exists at the start of the 21st Century.

Congress calls upon the CEC to continue to campaign for improvement in the legislation on Equal Pay. We welcome the setting up of the Women's Work Commission to look at Equal Pay and the Pay Gap and Trust that the Government will take on board their findings.

Congress calls upon the CEC to commission detailed research into the gender pay gap in the private sector and to plan the required legal and financial resources to campaign to eradicate discrimination in the private sector.

We should now demand that this legislation is amended and no longer should our sisters, daughters and granddaughters be treated as second class employees.

PUBLIC SECTOR PENSIONS

Congress notes that the current proposals to change public sector pension schemes would be detrimental to our members and instructs the CEC to mount a vigorous campaign to defend public sector pensions from central government and employers attacks. Public sector workers expect improvements in their pension schemes not reductions in their benefits so

Congress calls on the GMB to mount a campaign with the TUC and other bodies against the present Labour Government to protect the benefits currently provided by final salary public sector pension schemes in the NHS and other public sector bodies.

Congress empowers our National Officers to act on behalf of all Public Sector members in highlighting and acting on this Government's plans for restructuring Public Sector pension schemes. Our members' Terms and Conditions are already being eroded with the abolition of the 85 year rule in Local Authorities. The time has come for all Unions to unite and make a stand to show that all Public Sector workers are sick and tired of being classed as easy pickings, having to accept miserly pay deals and allowing the Private Sector to barge in and take the main core of our work.

This Congress agrees that a major contribution to the current pensions crisis is the reduction in contributions owing to the exclusion of privatised staff from Local Government and Health Service Pension Funds. Relentless privatisation has seen a year on year reduction in contributors to these funds and the time is fast approaching when they will be paying out more in pensions than they are receiving in contributions. The GMB must, as a matter of urgency, campaign to make it compulsory that any employee employed on a Local Government or Health Service contract has an absolute right to join the relevant Local Government or Health Service Pension Fund.

LOCAL GOVERNMENT PENSIONS

This Congress demands that the GMB starts a campaign for the union to stop the erosion of our members' benefits and terms and conditions and instructs the CEC to formulate, develop and put into effective practice a campaign addressing the following issues:

- Reopening of the consultation process with particular emphasis on the potential changes in 2008 for LGPS
- Setting up national negotiation rights to negotiate our members' Local Government pension . At the moment the unions do not have this right and we only have the right to consultation. Pensions is one of the most important areas of our members employment, and the unions must have a voice in any review or negotiation.
- The attack on public sector pensions and call upon Government to enter in constructive negotiations with the trades unions to establish a long term solution to the country's pension crisis
- Protection of the benefits of the existing Local Government scheme
- Recognition from the employers that the present scheme represents members' pay and that adverse

- changes represent a pay cut for our members
- Strong emphasis on the depth of feeling of our LGPS members. A straw poll in Plymouth indicated an extremely strong 4-1 vote in favour of ongoing industrial action in support of maintenance of the present scheme
- No further employer pension holidays
- A comparison exercise with the state-provided pension scheme provisions for our Parliamentary representatives.

Congress urges the CEC to organise a vigorous campaign against the change in pension provision for our members within the Local Government Pension Scheme and to redress the anticipated negative outcome of the consultation process ending March 31 2005. Congress further expresses its determination to campaign for all pensioners and GMB members in particular, to receive a pension that allows them to live with dignity. Which will also remove any need for those of pensionable age to have any cause to depend on any means-tested benefits.

PENSIONS – RESTORE THE LINK

This Congress proposes that the Old Age Pension that is paid to all entitled people be tied to the average pay that is earned by all workers using the Governments figures. We also propose that the Tax situation for senior citizens be lowered. After a lifetime of paying direct and indirect taxes the senior citizens of this country have contributed more than their share? Lower taxes for the older generation will add comfort and dignity to their lives at a time when it is most needed?

Congress notes that the treatment of our pensioners means that they are amongst the poorest in Western Europe. We urge the Government to address the plight of many pensioners by means of increases to pensions in line with average earnings and also increases to allowances enabling many to have more disposable income. We condemn the continuing slide towards means testing and call for the restoration of the link between pensions and earnings together with an immediate increase to compensate for the loss in value of the basic state pension since 1979.

Congress also notes that existing concessionary transport schemes are patchy and largely inadequate. Congress therefore calls on the GMB to campaign for the early introduction of the right to free public transport for all elderly people across the United Kingdom.

This Congress calls upon the CEC to put pressure on this Labour Government to review the way our members are expected to self fund themselves when they are old and need to go into nursing, or care homes, using money that they have saved through going without in their working lives in a hope for a better retirement.

This Congress recognises that post WW2 the unacknowledged contribution of child-rearing women to the UK's economy, has resulted in unacceptable levels of poverty and destitution currently suffered by elderly women also that despite work-culture changes, the pension impact of child rearing continues to remain ultimately detrimental to women.

We call upon Congress to support our campaign by asking the government to bring in the following:

- 1 Restore the link with earnings
- 2 Free nationwide travel for all pensioners
- 3 A review on council tax
- 4 Free TV licences for all pensioners
- 5 Removal of all means testing

- 6 Legislation to remove Age Discrimination
- 7 Winter fuel payments in line with inflation
- 8 Retention of Pension Books
- 9 Lowering retirement age and equality

Congress for a long time we have listened to Labours promise of being the caring Government. Therefore we now ask that Labour start to act in accordance to its promises and start to deliver?

We would ask the Government to understand and not under-estimate the "Grey Vote"? We would also ask Congress that our GMB union should support this motion thus adding more weight to this request.

SAFEGUARDING PENSIONS

Congress recognises that despite the recent falls in stock market investments, occupational pensions remain the best means to reduce poverty in retirement.

Congress urges the General Secretary to lobby government for protective legislation to promote and maintain quality occupational pension schemes. This is to be additional, not as a replacement, to a well funded national government retirement pension scheme. Legislation must safeguard those workers who have paid contributions for many years in company schemes and who have planned for retirement on reasonable expectations.

Congress therefore calls upon the Government to recognise that the so called stakeholder pension is inadequate without legislation requiring employers to contribute towards their employees pensions.

This Congress calls upon the CEC to campaign and put pressure on employers to encourage their workers to join company pension schemes. With the population living in retirement longer, it is crucial that working people ensure that they are saving towards their retirement which will ultimately provide them with a better quality of life in their retirement. Employers should be encouraged to automatically enrol staff in their pension scheme and non-members should be invited to join on an annual basis. With the future of the state pension uncertain, it is imperative that where companies have pension schemes, that employees are allowed access and encouraged to join.

Congress fully supports the principle of index linking provisions in occupational pension schemes. Such provisions providing annual increases to the retired members of these schemes. To ensure that future pension value is not eroded the GMB will vigorously defend this principle and also make every effort to include it in all schemes where we have influence.

Congress calls on the Government to review the A.C.T. credit on pension funds because of the state of the industry at present with the view of reversing the 1997 decision that robbed pension funds of up to £5billion.

Congress supports the protection of pension entitlements to be TUPE'd along with jobs. This Congress instructs the NEC to campaign for the TUPE regulations to encompass pension provision.

Congress calls that the following areas should be looked at:-

1. When a "pension holiday" has been taken by a company and the pension fund is later found to be in deficit a fine should be levied on the employer, at least equal to the deficit.
2. When a company deliberately puts itself into liquidation rather than paying the full pension entitlement to its employees the company's assets should be sequestrated.

3. When a foreign owned company fails to fulfil its obligations to UK pension members the total assets of the company held in the UK should be confiscated.

4. Any company directors found to have sanctioned any of the above should be barred from holding a directorship in any UK company for life.

The government must also 'tackle' the abuse of company directors, who plunder schemes with large payments upon retirement, whilst closing schemes for the many who would ultimately, only take more moderate returns.

All workers should enjoy equal rights and the current rules that require an employee to have 12 months continuous employment before they can claim unfair dismissal is unacceptable.

It wasn't too long ago when Trade Unions were promised the further legislation necessary to fulfil John Smith's commitment to the TUC that under a Labour Government all workers would have equal rights from day one of their employment.

CENTRAL ARBITRATION COMMITTEE - RECOGNITION

Congress notes with concern the fact that the CAC route to recognition is fraught with problems due to the procedures being weighted in the employer's favour. It is becoming evident that there are many companies using US style union busting tactics, which include threats to close plants or businesses, use of threats to sack trade union representatives and offering inducements to staff to denounce the union, particularly while a union is seeking recognition. We only have to look at the example of the ASDA Distribution Centre in Northern Region to see how employers are allowed to intimidate their employees into rejection of recognition.

This Congress calls upon the CEC to campaign and lobby the Government to act against companies using anti-union tactics and for legislation to be introduced to prevent employers from brow beating their employees into submission. We also therefore call upon the CEC and General Secretary to use their best endeavours to seek a review of the procedural hurdles the union must get through to secure recognition and to lobby for amendments to the Employment Relations Act to stop bad employers preventing their workers getting access to the workplace protection they are entitled to.

- 167 Workplace Discipline – Dismissal (Southern Region)
 168 Changes to Employment Tribunal Legislation (Lancashire Region)

WORKPLACE DISCIPLINE

Congress recognises that the present assessment at Tribunals regarding how a person has been judged to have been unfairly dismissed is fundamentally flawed. Any employee, unfairly dismissed, should have the right of reinstatement with compensation for the 'injury to feeling,' trauma and embarrassment etc. or alternatively, the choice of non return and a higher level of compensation. It must be recognised that families make large commitments on the basis of their continuous employment. Furthermore, losing your job, is rated as one of the most damaging and traumatic of possible life events.

Congress requests that the General Secretary, in conjunction with the TUC, will lobby a returned Labour government, to review the basic principles of the above and produce a more fair and credible system, reflecting the natural laws of justice in a modern democracy.

The burden of proof, to dismiss, must be approaching that which is required in the criminal justice system. Congress calls upon the Government to review the present criteria with a view to changing the legislation to reflect that the claimant(s) are innocent until proven guilty, as in criminal law. Employment tribunals should be able to judge more than the reasonableness of procedure and should be able to impose and substitute their own unbiased view based on objective and universal standards. There should be no upper limit on the level of compensation for all unfair dismissals and amounts should reflect all relevant factors, for example, loss of earnings, years of service, age, loss of pension potential. This list is not exhaustive.

This Congress deplores the trafficking and exploitation of migrant workers in Britain and calls on the CEC to campaign and lobby the Government to ensure that these workers are protected and not exploited whilst working in the UK.

There is evidence that private employers in the UK are using coercive tactics to force migrants to work for low wages and in poor conditions, these coercive techniques include physical and sexual violence to debt bondage and blackmail. Migrant workers are taken on by labour agencies and given employment in sectors such as building work, farming, contract cleaning and residential care, but these agencies take a vast proportion of their wages.

This is an anathema to our Trade Union movement and it must be regulated. We, as a movement, have always fought for human rights and this is a blatant abuse of workers rights, whether they are UK citizens or not, these abuses must be stopped.

SECTION 127

Congress are requested to debate and call for the repeal of Section 127 of the Home Office Act, which states that all staff employed at Immigration Detention/Reception Centres are precluded from being involved in industrial action.

This Congress is asked to note the support of Group 4 Court Services membership for the repeal of Section 127 which denies the right to strike to employees in the custodial services.

This Congress calls on the Government to honour the ILO Convention of the Right to Withdraw Labour. Congress agrees to support Detention Reception Centre staff to enforce the Right to Strike.

REMPLOY

Congress, we are all well aware of the decline in manufacturing in the UK, but most people will be unaware that over the last few years over 800 manufacturing jobs have been lost within the Remploy organisation. This has, of course, affected our most vulnerable members and as you will appreciate these jobs have provided members with disabilities, to work within their local communities, thus giving them opportunity of employment which in turn rewards them with a decent standard of living, providing them the dignity and sense of purpose this employment brings to their lives. We therefore ask the CEC to instruct the National Secretary to co-ordinate a campaign to replace all the manufacturing jobs lost within each Remploy factory, thus supporting the local communities and maintaining the level of employment that our members deserve within the Remploy structure.

We call on the CEC on behalf of the GMB to lobby the Government, as in the year 2000 Remploy management agreed to hold factory levels at 6000 employees with no strings attached.

5 years have past where the factories have gone from approx 5900 to around 5100; this is a loss of approx 800 jobs.

Remploy management is adamant that it is not going to replace anyone who leaves. Therefore, what future is there for disabled people when Remploy is totally mismanaged. As a union we need to address this now.

PUBLIC SERVICES – PRIVATISATION

Congress recognises that PFI and other Government initiatives, designed to force expensive and inefficient private sector involvement into public sector capital projects is economically wrong and anti democratic.

This Congress demands that following the mass externalisation of many Local Government Services where our members lose out on pay, pensions, and many other terms and conditions, that this Government takes of the handcuffs which stop local authorities borrowing money by changing the law.

Many services are externalised as the law says that local authorities cannot either borrow from banks or other financial services, and they cannot make any profits.

This culture has resulted in many of our members jobs being privatised and the contractor then makes extortionate profits of the backs of our members which goes directly into the pockets of the companies share holders, rather than reducing the council tax, or more investment in services.

Congress calls on the Government to stop forcing local authorities into expensive PFI contracts and to allow authorities the freedoms and flexibilities to borrow capital and to determine local needs and priorities.

MANUFACTURING

Congress deplores the ongoing demise of manufacturing, 110,000 jobs lost in the last 12 months alone, and notes with concern the loss of British manufacturing jobs overseas as British and multi national companies move operations abroad to exploit low wage economies. Congress views the continuing loss of Manufacturing jobs across the UK with alarm and notes with concern the quality of replacement jobs available in the Economy as the levels of earning in the new jobs created does little to support the Government’s stated aims of the High Performance Workplace.

Congress acknowledges the vital contribution that the UK Manufacturing base makes to the overall Economy and calls upon congress to recognise that manufacturing output and employment remains central to UK economic success and prosperity, and that an increasingly global economy means that without international agreements such exploitation will only increase.

Many of these contracts are awarded in the majority of cases by those companies who submit the lowest tender and many accomplish this by manufacturing this work off-shore to meet these tendering costs. Congress believes that it is a scandal that billions of tax payers’ money is spent each year on supplies procured for the Public Sector which are not produced and manufactured in the UK.

Public Procurement involves a whole range of products and we believe that it is vital, to ensure job sustainability and protect manufacturing jobs within the UK, that contracts are given to companies that are UK based and manufactured within the UK. If contracts are awarded to UK firms who manufacture in the UK, this would provide work for UK citizens who in turn will be supporting the economy by paying taxes and reducing the burden on the state by reducing the need for state benefits that would be paid to those unemployed as a result of manufacturing job losses. We must also look to the future by providing work for our youth and our potential members.

In light of these concerns, the introduction of the Information and Consultation of Employees (ICE) Regulations is viewed with concern by Congress. Congress therefore:

- calls on Government to ensure that employers implement fully the Regulations and challenge those many Organisations for whom a wall of silence has become a way of life in their relations with our members, to ensure that proper information and consultation takes place prior to any important decisions being made
- also call on Government to fully implement the adopted EU Directive on public procurement as a means of developing a positive boost to Manufacturing, ensuring the legal obligation in contracting Authorities to

- consider social, employment, disability, and environmental issues when awarding public contracts and to halt these current trends, congress calls on this Government to implement a more pro-active programme to protect manufacturing jobs throughout the UK and Northern Ireland, securing the future of manufacturing in the UK

Congress therefore calls upon the CEC to:

- continue the GMB’s campaigns to highlight the importance of maintaining the UK’s manufacturing economy and to direct government policy towards supporting manufacturing employment
- join with other trade unions, the international labour movement and others to campaign for fundamental reform of the WTO and other global trade agreements to ensure that minimum wage and social standards are an integral part of any agreements.
- urge the Government to make the process of securing public procurement contracts more accessible for British companies who are based and manufacture in the UK, thus giving the tax payer value for money
- campaign for Government contracts to be awarded to UK companies in order to secure the manufacturing base on which the wealth of this country is built
- place the sustainability of a viable and dynamic manufacturing sector as a key priority

COWBOY EMPLOYERS & COMPANY ASSETS

Congress believes it should be illegal for company directors to sell assets to successor companies in which they have an interest at below market value. This would prevent the directors of companies which go bankrupt setting up another company with a different name and transferring asset to those companies. This Congress is deeply concerned at the number of companies who deliberately go into liquidation or insolvency and then use this as a means of dismissing a workforce only to begin trading again under a different name shortly thereafter. This Congress deplores such practice and calls upon this Government to put in place legislation to prevent these cowboy employers denying workers their rights.

POLITICAL FUND BALLOTS

Congress notes the resounding ‘Yes’ vote in the 2004 Ballot on the continuance of the Political Fund. It is pleasing to note that our members have once again voted overwhelmingly to retain our Political Fund. Congress welcomes the result of the recent ballot to maintain our Political Fund, but notices, with regret, that after two terms of a Labour Government, this is still a requirement, under Law.

Congress further notes that the cost of balloting our members is an enormous expense that the GMB could well do without. However, Congress believes this unnecessarily uses up members’ resources and is a hangover from previous anti-trade union governments.

Therefore, Congress calls on the Government to:

- Repeal the law for trade unions on Political Fund Ballots, the Thatcher Government legislation that demands Trade Unions ballot their members on the issue of holding a political fund

This anti Trade Union, Thatcherite legislation, should be abolished without delay. This legislation was brought about for the sole purpose of restricting the rights of trade unionists to participate in the political process. Trade Unionists can have the right to withdraw from the political fund if they so wish, but trade unions should not be by law forced at their own expense to hold a ballot on the wishes of a past Tory administration.

Congress calls on the CEC to keep up the pressure to ensure that this provision is removed from the statute book at the earliest opportunity. Congress therefore instructs the CEC to actively campaign within the TUC and Labour Party to get the Government to repeal the law on Political Fund Ballots.

This Congress resolves to oppose the seemingly arbitrary extension of executive powers. In particular the powers to allow the arrest and incarceration of foreign and British people within their/a “home” without trial or evidence. We should oppose any move to restrict personal liberties, and reduce the already thin ability for people to defend themselves from arbitrary arrest, imprisonment, or false accusation.

This Congress condemns the practice of the British Government of holding people in prisons without their being subject to due process of law and without access to full legal representation and support. Congress therefore calls on the Government to act on the Law Lords’ ruling of December 2004.

RACISM, FASCISM AND THE BNP

Congress is concerned about the electoral successes of the BNP. The threat and growth of racism and fascism is a threat to all that the GMB stand for. The growth of the neo-Nazi right in Europe shows that the fascist threat must be met head on and not ignored.

Congress accepts a negative climate created by increasingly restrictive immigration and asylum legislation, a hysterical media campaign, and growth of Islam phobia, but rejects the scapegoating of asylum seekers and welcomed the introduction of Legislation to exclude fascists from Union membership.

We welcome the continuing work of the “Show Racism the Red Card” campaign and encourage all branches to embrace this initiative as a means of raising awareness and combating racism in the workplace.

This Congress believes, contrary to the view expressed by some, that Branches are the lifeblood of the union. Congress further believes that the branch structure, coupled with well-developed political links, is the key to beating the BNP in elections.

Congress calls on the Trade Union movement to:

- keep up the campaign against the BNP and other xenophobic and racist parties and candidates
- support, promote, and build alliances with the Black Community, and Religious Organisations across the UK to oppose the insidious activities of the far right into the fabric of our society.

EUROPEAN CONSTITUTION

Congress notes that the “social” policy of the EU has been established from the very beginning of what has become the EU and incorporates completely trade union aims of full employment, workers and trade union rights, health and safety, training, maternity rights, integration of disadvantaged groups etc.

Therefore, Congress believes that the EU Constitutional Treaty will commit Member States to pursuing a social market economy, underpin the goal of full employment, promote social dialogues between employers and trade unions, enshrines a range of social, civic and political rights and entrench the key values of the European Social Model, which will ensure that European economic development goes hand in hand with employment and social rights.

Congress regrets that some Member States attempted to dilute the legal force of the Charter of Fundamental Rights, contained in the Constitution, but is satisfied that the Charter will apply to the full field of EU law and thus restrain Member States from abandoning the course toward a sound social market economy.

The GMB will not support any constitution that erodes the fundamentals of a social Europe. The proliferation of the ideas of ‘Reaganomics,’ Thatcherism and the free market doctrine of the Bush administration must not be allowed to prosper in a harmonised Europe. A pre-requisite of any constitution, in relation to workers and employment, must be a fundamental right to withdraw labour, without a cumbersome and procedurally bureaucratic process.

Congress welcomes the move to enhance the democratic accountability of the European Union and increase its efficiency in light of the recent enlargement to 25 Member States.

Congress calls on the GMB Executive to inform and educate members of the merits of the Constitution and publicly campaign in association with our social partners in support of a YES vote to ratify the proposed European Constitution in a UK Referendum.

This congress insists the General Secretary informs Government of the disappointment of GMB Members on the introduction of identity cards in Britain. The GMB believes that the introduction of identity cards is a serious threat to civil liberties and our fear is that this will open the door for other civil liberties to be compromised if we accept the introduction of Identity cards.

There is also the issue of each person having to pay for their own card even though they may not want one. This Congress opposes Government plans to introduce compulsory ID Cards. We do not believe they will increase security, but rather that the evidence shows they offer a false sense of security. Furthermore, we do believe they will be used in a discriminatory manner to further stigmatise minority communities.

Congress therefore instructs the General Secretary to start a campaign and insist that issuing of identity cards should stop immediately, and any that have already been issued are destroyed, and money reimbursed.

HOUSING

Congress must address the issue of affordable housing. In 95% of the country, first time buyers are now priced out of the market, with few homes to rent in the social housing sector. Our priority must be to build houses for need and not for greed. In January, John Prescott announced the Government's totally inadequate response.

Congress recognises that local authorities have made a major contribution to the provision of high quality affordable social housing. Congress calls upon the Government to halt its current policy of forcing local authorities out of housing and to provide the necessary funding directly to local councils to ensure a future for high quality, affordable council housing.

This Congress resolves to oppose the extension of the plan to sell off publicly owned property, originally begun by a Conservative Government and Labour's proposal to extend this into allowing Housing Association tenants the right to buy. The aim of social housing was to provide social safety to remove people from absolute poverty and homelessness to a first step on the property ladder.

Therefore Congress 2005 now calls on the GMB to demand that our Labour Government:

- makes capital investment available so as to ensure the long-term future of Public Housing as a social priority
- allows a fourth option for Council Housing – direct investment as an alternative to the Government's three options of transfer, PFI's and ALMO's.

We also urge the Labour party to implement Party conference decisions i.e. the passing of the NPF position on the introduction of the "fourth option" allowing local Councils once again to be decent affordable public housing.

We are still waiting for our union's response to the 8 motions submitted to the 2003 Congress to set out our position.

Congress believes that Public Sector Housing is in deep crisis and that the current interventions by Government are insufficient to meet "Tenants desire for affordable, high quality, social housing to meet the needs of those on lower income."

Congress recognises the contribution of the GMB in the fight to stop the privatisation of Council Housing and the support that the union has given to groups formed to oppose stock transfers. We note the success of the national organisation 'Defend Council Housing' and the financial backing the GMB has generously given to this alliance of trade unionists and tenants.

We now call on Congress to agree that the GMB should formally affiliate to 'Defend Council Housing' and play a more active role within that organisation.

SECURITY OF TENURE

Congress, this Conference calls upon the GMB to seek the support of the wider Trade Union movement to campaign for the Labour Government to implement legislation that will provide Security of Tenure for all elderly people in receipt of residential nursing accommodation on the same basis as those people who reside in council property.

Congress is concerned by the fact that with the escalating loss of beds due to home closures within the private care sector, residents are evicted with just six weeks notice. This is allowed to happen because unlike other people who rent their homes, this category of people are not covered by the Rents Act.

Recently, a legal challenge on behalf of such residents under the Human Rights Act was lost in the High Court.

In view of this, Congress believes that the treaty of Amsterdam, which supposedly outlaws discrimination, should be implemented immediately, and the wording must be challenged and Article 13 amended to incorporate all our citizens. Therefore, Congress calls upon the CEC to action this at every political level it has available to it.

Congress notes that July 2005 will see the arrival of the group of G8 leading industrial Nations for a meeting at Gleneagles in Scotland. The G8 summit will take place at Gleneagles in Scotland on July 6-8; and that a major demonstration against G8 policies will be taking place in Edinburgh.

Congress following on from the devastating effects and human tragedy seen by the world of the Tsunami in South East Asia it is clear that the G8 Nations have a Global responsibility to consider world poverty, the debt of developing countries, health, climate change, and conflict avoidance. Congress notes that Oxfam and other NGO's

are promoting a drive to Make Poverty History (though changes to trade rules, debt cancellation, more aid). Changes to trade rules and debt cancellation are not, by themselves, adequate policies to tackle 'Third World' poverty. We need to support democratic movements, and above all the trade union movement, in developing countries.

British government policy includes pressure for the privatisation of public services and 'liberalisation of markets' which includes a race to find cheaper and cheaper labour sources. This Congress notes that, for example, when the municipal water system was privatised in Manila families saw their water rates rise by over 300% in six years (War on Want). Meanwhile parasitic consultancy firms such as PriceWaterhouseCoopers and KPMG have made vast amounts from directing the privatisation of water, rail, electricity and postal services in developing countries.

Congress notes that:

- the G8 is a club of the major industrialised, capital nations, whose summits deal with macroeconomic management, international trade and relations with developing countries from the standpoint of these states
 - world trade is estimated to be worth \$10 million a minute – the world's 49 least developed countries account for only 0.4% of this (Christian Aid)
 - the cost of eradicating poverty would be 1% of global income (UNDP)
- This Congress notes that the campaign against the G8 is the first opportunity to press the campaign to 'Make Poverty History' and therefore the GMB resolves to support the demo. Congress therefore calls on the GMB to:
- work with Trade Unions from the G8 countries to ensure that tackling poverty, disease, and education becomes a priority issue of GMB lobbying
 - to engage with NGO's to promote an agenda which includes opposition to the drive to privatise basic public services; support for democracy campaigns; support for free trade unions and the right to a living wage

Congress urges Government during 2005 to campaign to introduce a just trade system and cancel unpayable debts while assuming the E.U. Presidency and hosting the G8 Summit

PUBLIC SERVICES – TWO TIER WORKFORCE

That Congress welcomes the levels of investment in our Public Services.

We especially welcome new recruitment in the NHS and Pre School Education.

However, the GMB remains deeply concerned about the use of PFI/PPP model to fund Public Service infrastructure investments. We want to work with a Labour Government to secure new investment and where necessary Policy revision.

Congress believes that excellent Public Services are essential to a prosperous, sustainable, healthier, and better educated United Kingdom delivered on the basis of co-operation not competition, responsive to the needs of individuals and their communities, properly funded, delivered efficiently by our members, and driven by a commitment to equality and social justice.

We therefore call for:

- A renewed emphasis on access to Public Services.
- A commitment that Public Services remain directly provided by the Public Sector.
- Closing the equality gap.
- Continued investment in our members who deliver Public Services.
- Greater involvement and participation by front line workers who deliver Public Services in developing their design and delivery.
- Fair employment practices and protection of employment standards for all Public Service workers, including access to Learning and Training, Gender Pay Equality, Protection of Pension Benefits.

This Congress is tired of promises from our Government to put in place legislation to ensure that all Public Service workers are on the minimum terms and conditions of employment as determined by their particular negotiating bodies, regardless whether they are employed by a public body or contractor.

Both the Public Service employers and contractors continue to develop ways of avoiding the Two Tier legislation which this Government introduced in order to provide for a level playing field in the procurement of Public Service contracts.

Congress calls upon Government to shore up these loopholes and that GMB mount a campaign in order to stop this discrimination of Public Sector workers.

This Congress reiterates the GMB's policy on keeping public services in house and notes the limited success of the two-tier workforce legislation. Congress believes that legislation should be introduced to make client employers joint and severally liable for their contractors' employees on their premises so they cannot escape their obligations towards them. Congress instructs the appropriate GMB representatives to ensure this becomes Labour Party policy. Congress instructs the National Officers to campaign further to completely eradicate the two-tier workforce that exists within many areas of employment.

This issue must be put back on the agenda at any meeting between the unions and Government like the meeting in Warwick.

Although there has been significant headway in reducing the two-tier workforce, the Government has allowed loopholes to exist, which are now being exploited by some employers.

It is these loopholes that now need to be filled so as to stop our member doing the same job for less money/benefits.

This Congress condemns the continuation of Two Tier Workforces in both the public and private sectors and calls upon all negotiators to campaign and encourage Local Authorities, when awarding contracts to the private sector that they build in a clause that would provide their staff with decent pay and conditions. The Greater London Authority is introducing a 'living wage' clause into the contracts it awards to the private sector and this should be the aim of all local authorities to ensure that those workers who are transferred from the public to the private sector when public services are contracted out, are employed on terms and conditions which are no less favourable than Local Authority employees would be employed on, which includes salary, benefits, entitlements, hours of work, holiday rights and pension rights. We call on the CEC to mount a campaign to encourage all Local Authorities to follow the GLA's lead.
